

prepared an Information Collection Request (ICR), approved by OMB (OMB #240-0194) on July 31, 1998. EPA then sent nearly 700 questionnaires to contacts identified for each State, territory, and Indian Land. EPA supplemented the information from the questionnaire through telephone interviews, on-site file searches, and information from other sources.

EPA additionally sought information from the public through: the National Drinking Water Advisory Council (63 FR 66168, 64 FR 18903); two notices in the **Federal Register** (64 FR 1108, 64 FR 1007); presentations at meetings of the Ground Water Protection Council; an Internet Web site (<http://www.epa.gov/OGWDW/uic/cl5study.html>); and, the July 28, 1998 proposed rule (60 FR 44652).

Well-specific reports were drafted for each well type covered in the study. Although the reports are tailored to the particular issues relevant to the well type, all of the reports address the following basic topics: (1) Well purpose and fluids released; (2) the extent to which the fluids released exceed drinking water standards at the point of injection; (3) generalizations about the characteristics of the underground zone receiving fluids from the wells; (4) contamination incidents or studies, if any; (5) vulnerability of the wells to spills or illicit discharges; (6) prevalence of the wells; and (7) existing State and federal controls.

Most reports have undergone extensive peer and EPA workgroup review (or are currently under review). EPA coordinated peer reviews of draft reports for each of the types of wells studied to ensure technical accuracy and completeness of the documents. Technical experts were located through various sources including the Ground Water Protection Council and three **Federal Register** notices seeking peer sources including the Ground Water Protection Council and three **Federal Register** documents seeking peer reviewers (64 FR 1007-1008). It should be noted that some peer review comments have not yet been addressed and are not reflected in the summary being made available through this document.

Inventory Models

Because States believe that their inventories on storm water drainage wells and large-capacity septic systems are inaccurate, EPA constructed inventory models to predict the national inventories for these two well types. Due to the limited information available, EPA developed the inventory

models by analyzing data collected from visits to a sample of census tracts.

Elizabeth Fellows,

Acting Director, Office of Ground Water and Drinking Water.

BILLING CODE 6560-50-P

FEDERAL RESERVE SYSTEM

Formations of, Acquisitions by, and Mergers of Bank Holding Companies

The companies listed in this notice have applied to the Board for approval, pursuant to the Bank Holding Company Act of 1956 (12 U.S.C. 1841 *et seq.*) (BHC Act), Regulation Y (12 CFR Part 225), and all other applicable statutes and regulations to become a bank holding company and/or to acquire the assets or the ownership of, control of, or the power to vote shares of a bank or bank holding company and all of the banks and nonbanking companies owned by the bank holding company, including the companies listed below.

The applications listed below, as well as other related filings required by the Board, are available for immediate inspection at the Federal Reserve Bank indicated. The application also will be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the standards enumerated in the BHC Act (12 U.S.C. 1842(c)). If the proposal also involves the acquisition of a nonbanking company, the review also includes whether the acquisition of the nonbanking company complies with the standards in section 4 of the BHC Act (12 U.S.C. 1843). Unless otherwise noted, nonbanking activities will be conducted throughout the United States.

Unless otherwise noted, comments regarding each of these applications must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than August 6, 1999.

A. Federal Reserve Bank of San Francisco (Maria Villanueva, Manager of Analytical Support, Consumer Regulation Group) 101 Market Street, San Francisco, California 94105-1579:

1. *EverTrust Financial Group, Inc.*, Everett, Washington; to become a bank holding company by acquiring 100 percent of the voting shares of Everett Mutual Bank, Everett, Washington, and Commercial Bank of Everett, Everett, Washington.

Board of Governors of the Federal Reserve System, July 7, 1999.

Robert deV. Frierson,

Associate Secretary of the Board.
